

Suffolk County Addresses Septic System Safety At LILWA Board Meeting - 11/05

At a recent board meeting (11/15/05) Mr. Walter J. Hilbert, P.E., Principal Public Health Engineer of the Suffolk County Department of Health Services gave a short presentation on current code requirements concerning the installation of new residential septic systems on Long Island. Following his presentation the board had a short Q&A with Mr. Hilbert on current topics such as block cesspools, advising the public on safety issues concerning collapsing cesspools, and proper upgrades to existing systems.

[Click here](#) for some useful links the public and membership can use to obtain code information and documents that pertain to abandoning existing cesspools, certification of newly installed systems, and the code requirements pertaining to residential and commercial systems.
